Introducing the Medium Meeting Room Solution

01

Q-NEX Medium Room Solution is designed to deliver a clear audio and visual experience for meetings rooms. The innovative technology ensures clear audio and visual communication, creating a focused and efficient meeting environment for 20-50 participants. Experience intelligent wireless mic systems, camera tracking, and central control for seamless meetings.

Recommended Room Size and Capacity

Capacity
20-50 people

Size
40-100m²

Features

03

Intelligent Wireless Mic System

The desktop gooseneck microphones support around 80 connections or more, enabling simultaneous speech. This system ensures clear speech output without the need to be close to the microphone, enhancing the overall effectiveness of meetings.

Features

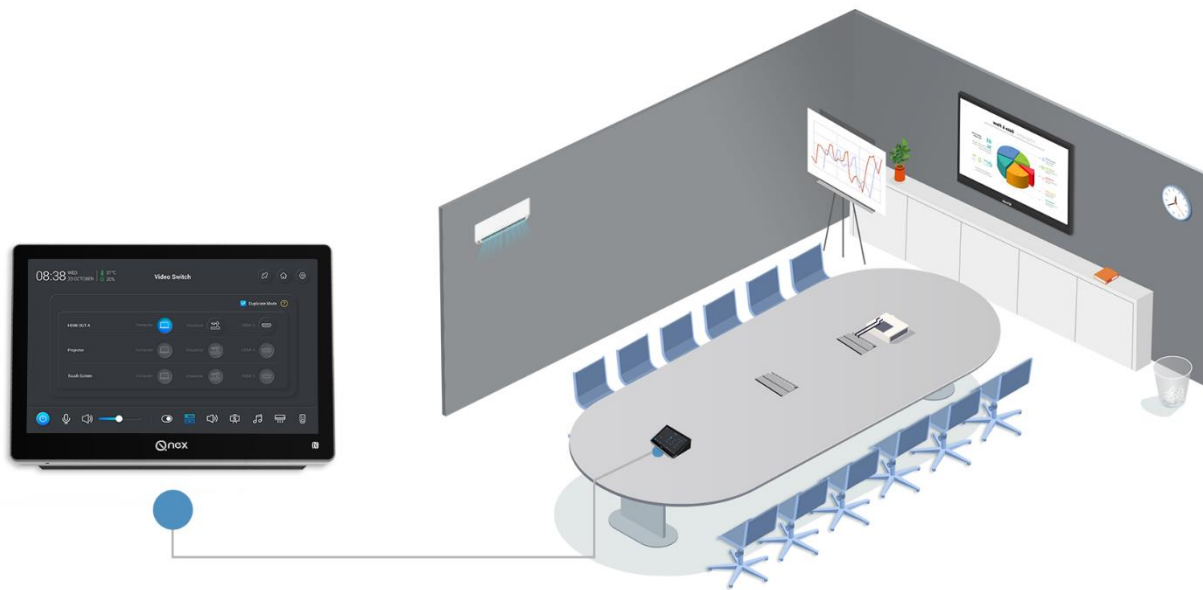

Camera Tracking the Active Speaker

Connecting PTZ cameras to desktop microphones enables tracking of the active speaker. When meeting participant activates the microphone, the camera follows the speaker's movements, enhancing focus and engagement in both online and offline conferencing scenarios. The meeting room supports multiple PTZ camera connections and switching, providing comprehensive multi-angle camera tracking and recording within the conference space.

Features

05

Central Control by Touch Panel

A stylish and versatile Touch Panel with graphical user interface empowers the meeting room central control with powering on and off the audio and video device, HDMI image switch, volume adjustment, and IoT device control for light, A/C, e-curtain, etc.

Features

06

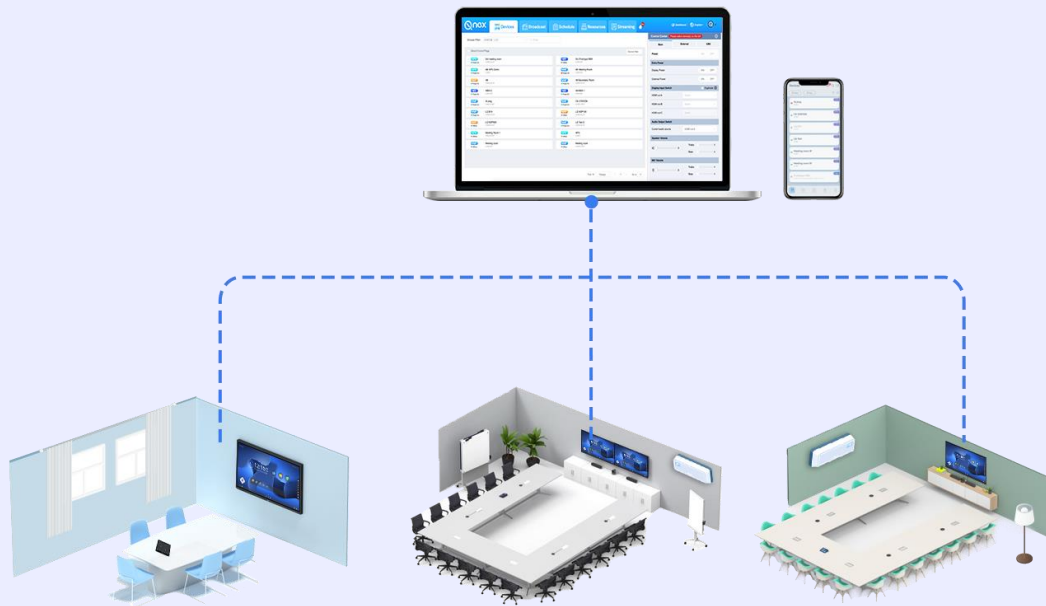

Online Meeting Support

In video conferencing scenarios, the software can directly connect to NPS-connected devices, utilizing meeting room microphones and cameras. This feature simplifies the process for meeting participants during online meetings, fostering communication between local and online attendees, overcoming spatial limitations.

Features

07

Remote Control of Meeting Room Devices

Facilitating remote control of meeting room devices allows for the centralized management of multiple meeting rooms within the organization. This not only reduces manual operations but also supports scheduling, simplifying pre-meeting preparation and post-meeting device management.

Features

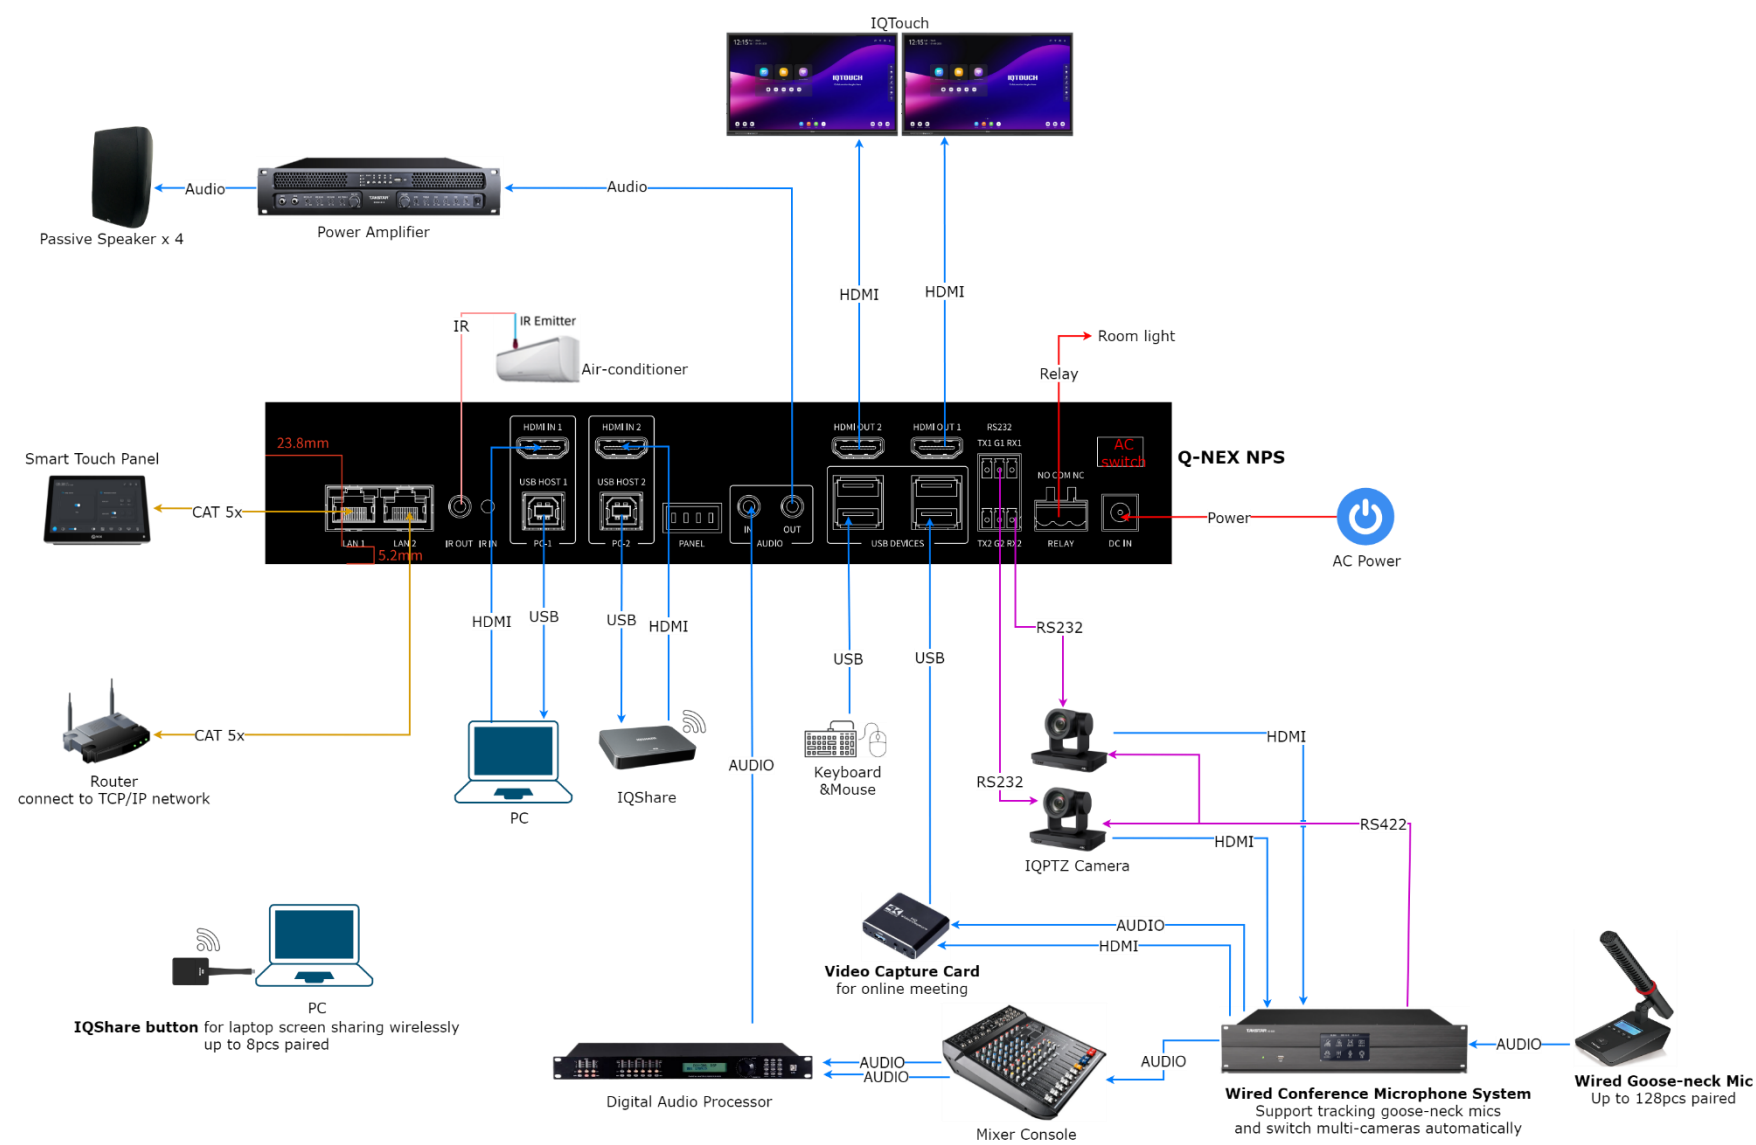

08

Local Audio Amplification

Facilitating remote control of meeting room devices allows for the centralized management of multiple meeting rooms within the organization. This not only reduces manual operations but also supports scheduling, simplifying pre-meeting preparation and post-meeting device management.
