Features of Q-NEX Collaborative Learning Solution

Q-NEX collaborative learning solution endeavors to bridge these gaps by enabling seamless two-way screen-sharing control between teachers and students. This innovative solution not only empowers teachers to deliver vibrant classes that greatly enhance students' interaction, but it also encourages students to actively participate in classroom discussions and yield fruitful outcomes.

Tools for team collaboration like document sharing, online meetings, team chat, etc.

Easy creation and sharing of custom content, notes and group activities.

Encourage critical thinking and group competition to promote engaged learning.

Collect group work and broadcast to all for comparative teaching.

Flexibility to support both synchronous and asynchronous group learning.

Maximize efficient and seamless teacher-student interaction and group discussion.

Layout of Connected Devices

Application scenarios

03

Convenient Screen Sharing for Teachers' Lecturing

During lecturing, the teacher can wirelessly share screen contents from personal device (laptops or tablets) to the classroom display, and also to all or targeted group TVs, so that students can see the presentation clearly within their own group. Through the NDP500, the teacher can easily make annotations and sync the content to students. Lecturing is made easier.

Application scenarios

04

Easy Interaction and Collaboration among Students in a Group

In a group discussion, each group member can present personal content from his laptop or mobile devices to the group TV for efficient discussion. So, students do not need to move around in the group exchanging ideas. It maximizes the student's interaction and collaboration within the group.

Application scenarios

Share Ideas across the Groups with Teacher-student Interaction

When students finish their discussion, the teacher can capture the group work from targeted or all the group TVs onto the big screen, then share the screen contents across the groups, enabling all the class to see the discussion result, make comparisons or comments. It not only improves students' engagement with a better learning experience but also enables students to think proactively.

Application scenarios

06

Touch Panel Enabled Control

By integrating with Q-NEX NDP500(Desktop Digital Pogium),teachers can directly control the two-way screen sharing on the NDP500 Touch Panel via RS232 protocol for greater convenience. It allows teacher to control the screen sharing and NDP500-connected IoT devices at one stop.
